SUMMARY

Final-year B.Tech CSE (Artificial Intelligence & Machine Learning) student with hands-on experience building real-time computer vision applications in Python using OpenCV and MediaPipe, alongside SQL, data analysis, and AI/ML development. Completed cybersecurity job simulations with Tata and Deloitte Australia covering threat identification, incident response, and forensic analysis. Strong problem-solving skills with an interest in AI/ML engineering, software development, data science, and cybersecurity. Seeking opportunities to apply technical skills to real-world projects and contribute to innovative solutions.

EDUCATION

B.Tech in Computer Science Engineering — Artificial Intelligence & Machine Learning
Chaitanya (Deemed to be University), Hyderabad, Telangana
Expected Graduation: 2027 | CGPA: 8.5 / 10

Class XII (PCMB) — Karnataka Pre-University Education Board
Class X (SSLC) — Karnataka Secondary Education Examination Board

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

AI & Machine Learning: Machine Learning, Generative AI, Computer Vision, OpenCV, MediaPipe

Development: React, FastAPI, Streamlit, REST APIs

Data & Analysis: Pandas, NumPy, Data Analysis, Data Visualization

Cloud & Tools: Google Cloud, Git, GitHub, VS Code

Security: Cybersecurity, Information Security, RAG, Prompt Engineering

PROJECTS

AI-Based Monitoring of Productivity and User State (AMPUS) — *Personal Project*
Python, OpenCV, MediaPipe, Computer Vision

- Designed and built an AI-driven system that monitors user productivity and mental/emotional state in real time through webcam-based analysis.
- Integrated activity monitoring, face detection, and fatigue detection into a unified AI fusion engine for continuous user-state assessment.
- Applied Python, OpenCV, and MediaPipe to process live video streams and extract facial and behavioral signals.
- Converted behavioral signals into quantified productivity scores and generated real-time, personalized suggestions for the user.

Student Performance Prediction — Python, Pandas, NumPy, Scikit-learn
COVID-19 Data Analysis — Python, Pandas, Matplotlib, Seaborn
Student Marks Data Analysis — Python, Pandas, NumPy

INTERNSHIP & TRAINING

BeeSkilled — Python for Data Analysis
Sep 2026 – Oct 2026

CERTIFICATIONS

Cybersecurity Analyst Job Simulation — Tata

- Completed a simulation covering security analysis, threat identification, and incident response.

Cyber Job Simulation — Deloitte Australia

- Completed a simulation covering cybersecurity concepts, risk assessment, and forensic analysis.

ACHIEVEMENTS

- Adobe University Hackathon 2026 — cleared Round 1 (Online Assessment: MCQ & Coding)
- Participated in national-level hackathons
- Completed Data Science with Python training at BeeSkilled
